

Horizon

executive class.....

Model #1525
in Prague Gunmetal
with High Back

Model #1515
in Prague Onyx
with Mid Back

The Horizon is a traditional executive styled chair, ideally suited for multi task use including conference and meeting room applications. The classic stitching on the seat and back add to the aesthetics of a chair whose ergonomic range is as impressive as its comfort.

Two distinct and ergonomically proportioned shell sizes provide the proprietary foundations for both our Standard Size and Big and Tall Size chairs in this series. Comfort and ergonomic support during prolonged use are derived from the High Resiliency foam, which is sculpted with the same attention to proportion as our hardwood ply shells.

Horizon – Armrest and Accessory Options

Unique styling and kinesiologist-designed support lends to the distinguished look of the Horizon. This is the only executive class chair to offer two distinct and ergonomically proportioned shells for both Standard and Big and Tall size seating. The Horizon comes with a vast array of available options that can be found on all of our BUILT2LAST™ seating products. Every standard model of the Horizon chair is shipped with # 5 polyurethane looped arms. Exclusive to the Horizon chair are three separate arm options.

5 Polyurethane Looped Arms

This arm combines one of the softest polyurethane armrests available with an aesthetically pleasing design that compliments the style and contouring of the Horizon.

7 Upholstered Cap-Polyurethane Arms

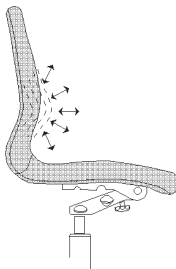

This arm has the same features and pleasing design as the looped arm. The addition of the cap provides extra comfort and support, and adds a finishing touch to the arm.

8 Fully Upholstered Arms and Panels

The upholstered arms and panels compliment the executive styling of the Horizon.

Air Pump Adjustable Lumbar

The air pump adjustable lumbar compliments the lumbar support already sculpted into the Horizon.

By simply compressing the pump bulb, or depressing the release valve, you may custom tailor the lumbar curvature to your own personal comfort level and help to reduce muscle fatigue and pressure on the spine's lumbar region.
