

# HE Vertical Mouse

Ergonomic Grip-type Vertical Mouse

The HEmouse is a multifunctional laser mouse designed for Notebook, PC's, and Desktop PC's. This fashionable HEmouse has a unique ergonomic vertical grip-type design, which reduces pain from extended mouse use. It not only looks good, but also helps users work in a safe manner.

The HE Mouse is designed in such a way that you hold your hand in the same position as if you were just stretching out your arm in front of you without holding a mouse or what we like to refer to as the "handshake position".

INNOVATIVE IDEAS IN WORKPLACE COMFORT

# HE Mouse Series

## Advantages:

- USB receiver
- Laser Sensor
- Resolution: 800/1200/2100/3400 DPI
- Default DPI Setting: 1200
- When you click DPI switch, DPI will switch to 2100-3400-800-1200-2100
- Support left (click) and right(menu) buttons
- Scroll wheel for simple navigation
- Backward / Forward buttons
- Support standard USB mouse drivers (not included)
- USB supports IBM compatible PC above Pentium CPU
- Operating system: Windows ® 98/ME/XP/7, Windows®2000, Windows® Vista (other USB mouse support OS)

The HE Mouse is designed in such a way that you hold your hand in the same position as if you were just stretching out your arm in front of you without holding a mouse or what we like to refer to as the "handshake position". So you don't rotate your hand in a horizontal manner like you would with a normal mouse, which alleviates much of the pressure created in the forearm area during mouse use. You will find this to be a more natural position for the hand and forearm which should result in safer and more comfortable computing.
